Prophecy

Fact Sheet

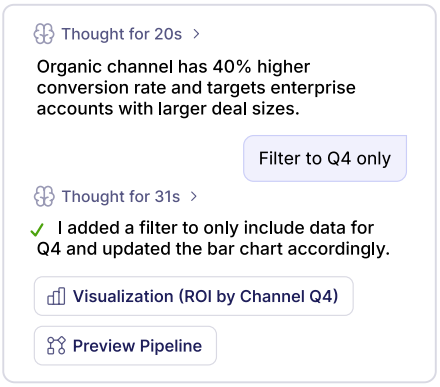
# Enterprise Edition

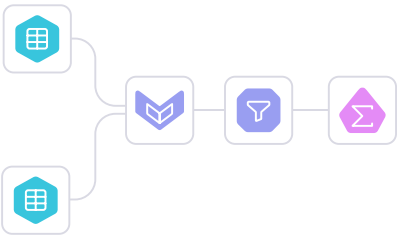
*AI for the data work your business runs on*

Prophecy equips the AI apps your teams already use for enterprise data work, from raw data to finished reports.

## Built for the Business, Governed by IT

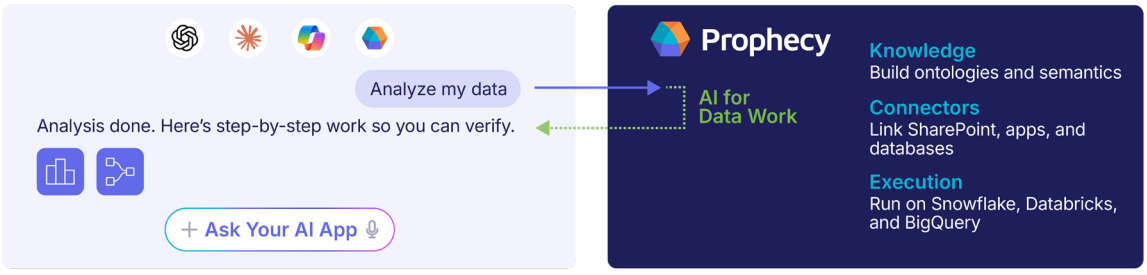
Users describe the data work in plain language, and AI builds the whole workflow: prep, analysis, and output. Users verify the output and operationalize with confidence. Workflows inherit governance from your cloud data platform and are backed by code that's version-controlled in Git.





## Available Inside ChatGPT, Claude, and Copilot

Prophecy DataGPT equips the AI apps your teams already use for enterprise data work. Business users prep, analyze, and report on data in plain language, and every result comes back with a visual workflow they can verify.



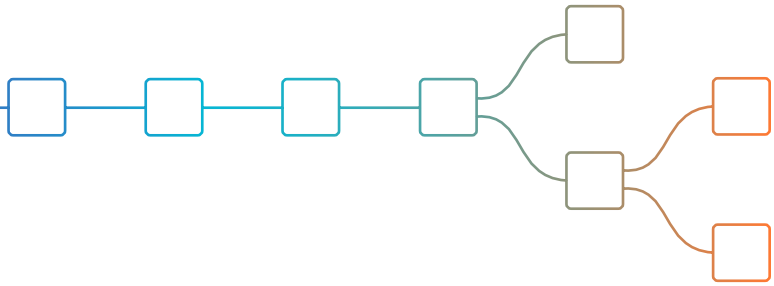
## For Data Platform Leaders

- ✓ Move business data work to governed AI workflows
- ✓ Bring AI to ChatGPT, Claude, and Copilot, with execution in your infrastructure
- ✓ Run on your existing Databricks, Snowflake, or BigQuery compute
- ✓ Inherit governance from your cloud data platform, backed by open code

## For Business Users

- ✓ Go from raw files to finished reports with plain language prompts
- ✓ Build in your AI chat or with visual drag-and-drop
- ✓ Validate every step with visual workflows
- ✓ Schedule workflows that get smarter with every run

# Enterprise Edition Features



## Core Features

- Prompt-driven or visual drag-and-drop data preparation
- Read/write data connectors
- Analysis dashboards
- Package hub
- Workspaces and teams
- Workflow scheduling

## AI Agents

- Transform agent
- Documentation agent
- Prophecy knowledge graph
- Custom AI skills
- Private LLM integration

## Data Processing

- Prophecy In-Memory (embedded DuckDB)
- Databricks, Snowflake, or BigQuery

## Transpiler (Import Feature)

- Import Alteryx workflows
- Import Informatica workflows

## Security and Compliance

- Google OAuth or password authentication
- System for Cross-domain Identity Management (SCIM)
- LDAP Authentication
- Single Sign On (SSO)
- SAML 2.0
- ISO 9001, ISO/IEC 27001 certified
- SOC 2 Type 2 attested
- SOC 1 Type 2 attested
- GDPR and CCPA compliant

## Governance

- Prophecy-managed or any Git connection
- Role-based access control (RBAC)
- Data lineage
- Audit logs

## Support and Services

- Community
- Dedicated Enterprise Support

## Interfaces

- Prophecy (dedicated SaaS environment)
- Prophecy DataGPT for ChatGPT, Claude, and Copilot, deployable centrally by admin
