

Enterprise Express Edition

Fast-track your data prep work with AI and hands-on onboarding

Enterprise Express combines Prophecy's AI agents with forward-deployed engineers, so your team builds and deploys visual data workflows on Databricks, Snowflake, or BigQuery with assistance from experts.

AI Data Prep & Analysis Platform

AI agents generate a visual data workflow for analysts to edit and refine, then deploy with confidence using software best practices. Charts, documentation, and code stay in sync with the workflow logic.

For Data Platform Leaders

- ✓ Democratize business analytics with AI
- ✓ Run workflows on your existing Databricks, Snowflake, or BigQuery compute
- ✓ Inherit governance from your cloud data platform
- ✓ Eliminate vendor lock-in with open code

For Business Analysts

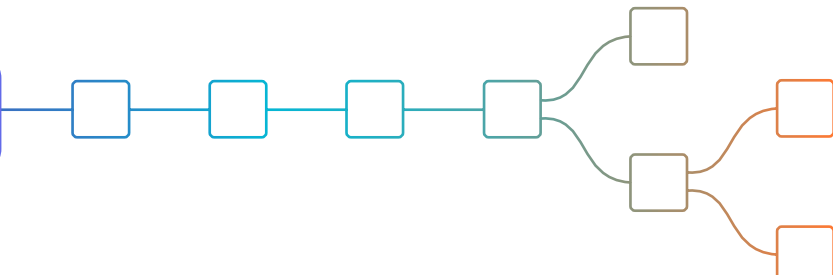

- ✓ Get insights faster with the help of AI agents
- ✓ Validate AI-generated logic with visual workflows
- ✓ Save time with auto documentation
- ✓ Automate data prep work with scheduling and monitoring capabilities

Accelerate Adoption with Forward Deployed Engineers

Build your first project within 90 days with a dedicated Prophecy engineer by your side. Hands-on onboarding and guidance are designed so you won't be stuck in a stalled pilot.

Enterprise Express Features

Core Features

- Visual drag-and-drop data preparation
- Read/write data connectors
- Analysis dashboards
- Package hub
- Workspaces and teams
- Workflow scheduling
- Flexible credits

AI Agents

- Transform agent
- Documentation agent
- Prophecy knowledge graph
- Custom AI skills
- Private LLM integration

Data Processing

- Prophecy In-Memory (embedded DuckDB)
- Databricks, Snowflake, or BigQuery
